Majid Abbasov Charged Balls Method. Construction. Convergence Analysis	20
Vagif Abdullayev, Kamil Aida-Zade Synthesis of the Control of the Temperature Maintaining Process in a Heat Supply Problem	21
Karine Abgaryan, Ilya Mutigullin, Olga Volodina, Sergey Uvarov Multiscale Modeling of Clusters of Point Defects in Semiconductor Structures	22
Karine Abgaryan, Ilya Mutigullin, Olga Volodina Application of High-Performance Calculations for the Fitting of Interatomic Potentials .	23
Alexander P. Afanas'ev, Sergei M. Dzyuba, Elena V. Putilina, Irina I. Emelyanova Approximate Solution of the Problem of Stabilization of Non-Linear Systems with Singular Matrix of Control Weight Coefficients	24
Alexander Afanasiev, Vladimir Krivonozhko, Andrey Lychev, Oleg Sukhoroslov Three-Dimensional Visualization of Multidimensional Frontier Using Distributed Computations	25
Kamil Aida-Zade, Yegana Ashrafova Optimal Control by the System of Differential Equations of Block Structure with Blocks, Related by Boundary Conditions	26
Kamil Aida-Zade, Vugar Hashimov Optimization of Placing of Measurement Points and Membrane Vibrations Damper Points on Synthesis of Control by its Stabilization Modes	27
Kamil Aida-Zade, Vagif Abdullayev Optimization of Loading Places and Reaction Functions on them in Systems with Distributed Parameters	28
Alla Albu, Vladimir Zubov On the Stability of the Algorithm for Solving the Inverse Coefficient Problem for the Heat Equation	29
Alla Albu, Andrei Gorchakov, Vladimir Zubov On the Effectiveness of the Fast Automatic Differentiation Methodology	30
Damir Alimov, Nataliia Obrosova, Alexander Shananin Analysis of Indicators of High-Technology Production Using Optimization Models, Taking into Account the Shortage of Working Capital	31

Meiramkul Amangaliyeva, Muvasharkhan Jenaliyev, Assem Ayazbayeva, Kanzharbek Imanberdiyev On Stabilization Problem for a Loaded Heat Equation: the Two-Dimensional Case	32
Yedilkhan Amirgaliyev, Lyaillya Cherikbayeva, Didar Yedilkhan, Bekturgan Kalybek Uuly Group Solution of the Classification Problem on the Basis of Compact Groups	33
Yedilkhan Amirgaliyev, Murat Kunelbayev, Aliya Kalizhanova, Didar Yedilkhan, Omirlan Auelbekov, Nazbek Kataev, Ainur Kozbakova Calculation of the Solar Heating System of a Residential Building	34
Saltanat Amirgaliyeva, Olga Ostapenko, Didar Yedilkhan Analytical Methods for Solving Linear Game Models with Different Dynamics .	35
Gulshat Amirkhanova, Andrei Gorchakov, Aigerim Duysenbaeva The Application of the Methodology of Fast Automatic Differentiation to Calculate the Gradient of the Potential REBO (LAMMPS)	36
Anton Anikin, Aleksander Gornov, Alexander Andrianov GPU-Accelerated Algorithms for Morse Potential Energy Minimization	37
Evgeny Antonov, Dmitry Golembiovsky, Dmitry Denisov Recurrent Algorithm for Scenario Lattice Construction	38
Dmitry Arkhipov, Olga Battaia, Alexander Lazarev, German Tarasov, Ilia Tarasov New Task Domain Propagators with Polynomial Complexity for Resource-Constrained Project Scheduling Problem	39
Ewa Bednarczuk, Agnieszka Prusińska, Alexey Tretyakov p -Factor Approach for Solving Nonregular Mathematical Programming Problems	40
Armen Beklaryan, Leva Beklaryan, Alexander Gornov Solutions of Traveling Wave Type for Korteweg-de Vries-Type System with Polynomial Potential	41
Petre Birtea, Ioan Casu, Dan Comanescu Optimization on the Symplectic Group and Applications	42
Vladimir Bogdanov, Yuriy Volkov Shape Preserving Conditions under Interpolation by Parabolic Splines	43
Radu Ioan Bot A General Double-Proximal Gradient Algorithm for D.C. Programming	44

A.S. Buldaev, I.D. Burlakov The Method of Non-local Control Improvement in Optimal Control Problems with Constraints	45
Oleg Burdakov, Serge Gratton Limited Memory Methods with a Search over a Model-Based Steepest Descent Path	46
Igor Bykadorov Dynamic Marketing Model: Optimization of Retailer's Role	47
Igor Bykadorov Retailing under Piece-Wise Constant Pricing	48
Ilya Chernykh Sufficient Conditions for Polynomial Solvability of the Two-Machine Preemptive Routing Open Shop on a Tree	49
Aladin Crnkić, Vladimir Jaćimović Swarms on Spheres for Unsupervised Learning	50
Ivan Davydov, Yury Kochetov An Effective Heuristic for the l_1 -Metric ($r p$)-Centroid Problem	51
Vasily Dikusar, Andrzej Yatsko Optimal Control of Train on Uneven Surface Profile	52
Olga Druzhinina, Olga Masina, Alexey Petrov The Synthesis of the Switching Systems Optimal Parameters Search Algorithms	53
Darina Dvinskikh, Alexander Gasnikov, Pavel Dvurechensky, Alexey Kroshnin, Cesar A. Uribe, Angelia Nedich Centralized Distributed Optimization for Wasserstein Barycenters	54
Pavel Dvurechensky, Alexander Gasnikov, Sergey Omelchenko, Alexander Tiurin A Stable Alternative to Sinkhorn's Algorithm for Regularized Optimal Transport	55
Vladimir Elkin Isolation of the Trivial Part of a Nonlinear Control System	56
Anton Ereemeev, Igor Ziegler, Alexander Kononov On Complexity and Exact Solution of Production Groups Formation Problem	57
Yuri Evtushenko, Alexey Tretyakov, Vlasta Malkova New Perspective on Some Classical Results in Optimization	58
Yuri Evtushenko, Alexander I. Golikov Systems of Linear Equations and/or Inequalities, Duality and Unconstrained Optimization	59
Alexander Fominyh Optimal Control of Convex Differential Inclusion	60

Damir Gainanov, Nenad Mladenovic, Varvara Rasskazova, Dragan Urosevic Constructive Heuristic with Guaranteed Bounds (CHwGB)	61
Vladimir Garanzha, Liudmila Kudryavtseva Approximate Minimal Curvature Surfaces in the Multiple Springback Algorithm for Construction of Prismatic Mesh Layers	62
Vladimir Garanzha, Liudmila Kudryavtseva, Valeria Tsvetkova Near-Boundary Layered Voronoi Meshing Algorithm for Planar Domains	63
Vladimir Garanzha, Liudmila Kudryavtseva Stabilization of Moving Adaptive Meshes via Interpolation of Control Metrics for Equidistribution Principle	64
Edward Kh. Gimadi An Approximation Algorithm for the Network Capacitated Facility Location Problem	65
Edward Kh. Gimadi, Anna Kurochkina An Improved Polynomial Algorithm for the Path Uniform Capacitated Facility Location Problem	66
Alexander Gнусarev, Tatyana Levanova Comparison of Two Heuristic Algorithms for Competitive p-Median Facility Location Problem	67
Andrei Golman, Daniil Musatov Approximate Coalitional Equilibria in the Bipolar World	68
Victor Gorelik, Tatiana Zolotova Approximation of the Improper Linear Programming Problem with Restriction on the Norm of the Correction Matrix of the Left-Hand Side of the Constraints	69
Aleksander Gornov, Timur Shamirzayev Optimization Technology for Approximation of System of a Partial Differential Equations System of the Second Order	70
Natalia Grigoreva Branch and Bound Algorithm for the Single Machine Scheduling Problem with Release and Delivery Times	71
Iakov Grinberg Maximum Flow in Graphs with Limited Arc and Node Capacities	72
Egor Grishin, Semen Galakhov, Alexander Lazarev Scheduling of Locomotives' Maintenance TS-2 in a Depot	73
Mikhail Indenbom, Viktor Izhutkin, Anton Sharapov, Alexander Zonov Synthesis of Conical Phased Antenna Arrays Optimization of Amplitude Distribution Parameters	74

Evgeny Ivanko One-Level Menu Optimization: How to Make Conventional Things Better	75
Evgeny Ivanko, Pavel Chentsov, Yaroslav Salii Influence of Altruists on Connectivity of Dynamic Wireless Mesh Network	76
Alexey Ivanov, Victor Emelianov Optimization in Post-Processing of Molecular Docking Results	77
Grigorii Ivanov, Maxim Golubev Alternative Theorem for Differential Games with Strongly Convex Admissible Control Sets	78
Grigorii Ivanov, Mariana Lopushanski, Maxim Golubev The Nearest Point Theorem for Weakly Convex Sets in Asymmetric Seminormed Spaces	79
Anastasia Ivanova, Alexander Gasnikov, Pavel Dvurechensky Composite Optimization for the Resource Allocation Problem	80
Viktor Izhutkin The Combined Computer Model of the Solution of Conflict Situations	81
Viktor Izhutkin, Ilya Kocheshkov Computer Model of Colony of Microorganisms Acquired Pneumonia for Optimization of the Concentration of Antibiotic	82
Igor' Izmet'sev, Viktor Ukhobotov On a Linear Control Problem under Interference with a Payoff Depending on the Modulus of a Linear Function and an Integral	83
Vladimir Jaćimović, Milojica Jaćimović, Nevena Mijajlovic Distributed Consensus on Homogeneous Spaces	84
Muvasharkhan Jenaliyev, Murat Ramazanov, Madi Yergaliyev On the Coefficient Inverse Problem of Heat Conduction in a Degenerating Domain	85
Viacheslav Kalashnikov, Viktor V. Avramenko, Nataliya Kalashnykova Pattern Recognition with the Aid of Derivative Disproportion Functions	86
Sergey Kalenkov, Georgy Kalenkov, Alexander Shtanko Digital Hyperspectral Holography in White Light: Principles and Algorithms ...	87
Almas Kalimoldaev, Bulat Mukhamediev, Nicholas Olenev Distressed Assets in a Normative Dynamic Model of Kazakh Economy	88

Maksat Kalimoldayev, Assel Abdildayeva, Maksat Akhmetzhanov, Beglan Namazbayev About the Numerical Solution of Optimal Control Problems for Complex Electric Power Systems	89
Ivan Kamenev The Population Groups Human Capital Dynamics Model Research	90
Dmitry Kamzolov, Pavel Dvurechensky, Alexander Gasnikov Universal Intermediate Gradient Method for Convex Problems with Inexact Oracle	91
Igor Kaporin Using Sparse Principal Component Methods for Approximating the Restricted Isometry Constants of Complex-Valued Tight Frames	92
Alexander Kelmanov, Sergey Khamidullin, Vladimir Khandeev, Artem Pyatkin An Exact Algorithm of Searching for the Largest Size Cluster in an Integer Sequence 2-Clustering Problem	93
Alexander Kelmanov, Vladimir Khandeev, Artem Pyatkin NP-Hardness of Some Max-Min Clusterization Problems	94
Ruben V. Khachaturov Combinatorial Optimization on the Lattice of Cubes	95
Michael Khachay, Yuri Ogorodnikov Polynomial Time Approximation Schemes for the Euclidean Capacitated Vehicle Routing Problem with Time Windows	96
Nina Khairova, Orken Mamyrbayev, Natalia Sharonova, Kuralai Mukhsina The Justification for the Use of the Theory Intelligence Methods as a Basic Tool for Modeling Semantic Relations of a Language System	97
Oleg Khamisov, Mikhail Posypkin, Alexander Usov Piecewise Linear Bounding Functions in Univariate Global Optimization	98
Vladimir Khandeev Approximation Scheme for a Problem of Searching for the Largest Subset	99
Dmitry Khlopin Necessary Conditions of Overtaking Optimality and Convergence of Subdifferentials	100
Dmitry Khlopin On Strategies Guaranteeing Uniform Value	101
Konstantin Kobylkin Approximation Algorithms for Geometric Intersection Problems	102

Yury Kochetov, Polina Kononova Stochastic Tabu Search for the Single Machine Scheduling with Setups and Storage	103
Yury Kochetov, Alexander Zyryanov, Sergey Lavlinskii Comparison of Two Matheuristics for the Strategic Planning Public-Private Partnership	104
Liudmyla Koliechkina, Oksana Pichugina Multiobjective Optimization on Permutations with Applications	105
Roman Kolpakov, Mikhail Posypkin The Scalability Analysis of a Parallel Tree Search Algorithm	106
Nikola Konatar, Darko Mitrovic Stochastic Flow on Manifolds	107
Vladimir Krivonozhko, Andrey Lychev, Nina Blokhina Frontier Visualization for Nonconvex Models with Increasing and Decreasing Returns to Scale with the Use of Enumeration Methods	108
Konstantin Kudryavtsev, Vladislav Zhukovskiy Cournot Oligopoly and a Berge Equilibrium	109
Konstantin Kudryavtsev, Irina Stabulit, Viktor Ukhobotov Problem of Deposit Diversification under Fuzzy Information	110
Ilya Kurochkin, Yakov Grinberg, Alexandra Prun Comparative Analysis of Heuristic Routing Algorithms Depending on the Network Topology of the Network Graph	111
Oleg Kuzenkov Variational Principle of Biology Based on Measure Dynamics	112
Alexander Lazarev, Nail Khusnullin, Elena Musatova, Denis Yadrentsev, Maxim Kharlamov, Konstantin Ponomarev Minimization of the Weighted Total Sparsity of Cosmonaut Training Courses	113
Tatyana Levanova, Stanislav Belan Heuristic Algorithm for the Bi-Level Facility Location and Design Problem	114
Sergey Lupin, Sai Win Maw, Aye Min Thike Parallel Application for Works Distribution in Hierarchic Systems	115
Ustav Malkov, Nikolay Sokolov The Lemke-Howson Algorithm Solving Finite Non-Cooperative Three-Persons Games in a Special Setting	116

Orken Mamyrbayev, Mussa Turdalyuly, Nurbapa Mekebayev, Kuralay Mukhsina, Alimkhan Keylan, Bagher Babaali, Gulnaz Nabieva, Yergali Dauletbek Continuous Speech Recognition of Kazakh Language	117
Vladimir Mazalov Network Partitioning Algorithm Based on Myerson Value	118
Yurii A. Mezentsev, Pavel S. Pavlov Revisiting the Implementation of the Decomposition Algorithm for Solving One Class of Discrete Optimization Problems with a Semidefinite Relaxation	119
Igor Mikhailov, Andrey Atamuratov, Nikolay Taran Numerical Damping of Forced Oscillations of an Elastic Beams	120
Arsalan Mizhidon, Klara Mizhidon On the Choice of Optimal Parameters in a Class of Mechanical Systems	121
Klara Mizhidon On One Approach to Solving the Control Problem with Phase Constraints	122
Irina Moiseeva, Alexander Stein, Gregory Lyubimov Possibility to Use the Results of Mathematical Modeling for Clarifying the Diagnosis in Glaucoma	123
Gulnaz Nabiyeva, Sultan Akhmetov, Aliya Kalizhanova, Lyazzat Balgabayeva, Timur Kartbayev, Aliya Doszhanova Research and Development of Models for Modular Data Processing Systems of Various Classes and Purposes	124
Robert Namm, Georgiy Tsoy, Elinna Vikhtenko Modified Duality Method for Solving an Elastic Problem with a Crack Extending to the Outer Boundary	125
Dmitry Nazarov, Oleg Abramov A Software System for Acceptability Region Construction and Optimal Parametric Synthesis	126
Yurii Nesterov, Alexander Gasnikov, Sergey Guminov, Pavel Dvurechensky Primal-Dual Accelerated Gradient Descent with Line Search for Convex and Nonconvex Optimization Problems	127
Andrei Nikolaev Vertex Adjacencies in the Polytope of Pyramidal Tours with Step-Backs	128
Evgeni Nurminski Projection Problems and Algorithms	129

Lazar Obradovic Locally Constant Model Uncertainty Risk Measure ..	130
Nicholas Olenev A Model of Economic Growth with Consumer Optimization and a Given Age Limit for Production Capacity	131
