Preface

Welcome to 2010 IEEE International Conference on Intelligent Computing and Intelligent Systems (ICIS 2010)! Welcome to Xiamen, China! We believe that the solid conference program and the amazing city of Xiamen will offer you irresistible attraction.

This year's ICIS 2010 is co-sponsored by IEEE Beijing Section, Xiamen University, Fujian Association for Artificial Intelligence, Shanghai Jiaotong University, Iwate Prefectural University. Much work went into preparing a program of high quality.

At this very moment, we would like to thank the program committees and the organizing staffs for their hard work. We would like to especially thank Xiamen University for hosting this conference. We would like to deliver our appreciation to the keynote speakers for their great contribution to this conference.

The scope of this conference is to gather researchers from different areas and disciplines to present results and participate in discussions under the common theme of intelligent systems and computing. These interactions will facilitate a better understanding of the diversity of the different approaches as well as of their similarities. In addition it will open the way for applying approaches that have been successful in one area to problem solving in different areas and applications.

We wish each of you successful deliberations, stimulating discussions, new friendships and all enjoyment that Xiamen can offer. While this is a truly remarkable Conference, there is more yet to come. We look forward to seeing all of you in Xiamen.
