## **Preface**

The 7th International Conference on Information Communication and Management (ICICM 2017) was held in Moscow, Russia during August 28-30, 2017. The purpose of ICICM is to bring together researchers and people from industry working in the fields of information communication and management. It seeks to offer a broad spectrum of current research in the related area.

The volume consists of 32 selected papers (from originally 62 papers) which are presented orally at the conference or via poster session. The topics of papers include computer theory and engineering, wireless communication and network technology, information system design and development, logistics and supply chain management.

The papers are accepted after being peer-reviewed by the conference Technical Program Committee and international reviewers based on the topic of each paper. All the authors of accepted papers have done excellent presentations on this conference via oral presentation or poster presentation. On the basis of the conference achievement, we collect and compile these research papers into the conference proceedings, in which the content represents the latest international academic progress of information communication and management fields. We hope that the presented papers will be interesting for readers and be a good base for inspiration for future development.

The chairpersons, keynote speakers played important role in conducting the proceedings of the session in a timely and efficient manner and on behalf of the conference committee, we express sincere appreciation for their involvement. The reviewers of the manuscripts, those by tradition would remain anonymous, have also been very helpful in efficiently reviewing the manuscripts, providing valuable comments well within the time allotted to them. We express our sincere and grateful thanks to all reviewers.

We truly believe the participants will find the discussion fruitful, and will enjoy the opportunity for setting up future collaborations. It is our sincere hope that ICICM will one day become the leading conference in this specific academic area.
