The Belt and Road Initiative

Law, Economics, and Politics

Editors: Julien Chaisse and Jędrzej Górski

This 28-chapter volume brings together academics and practitioners to provide a comprehensive legal, economic and political analysis of the Belt and Road (BRI) initiative that has emerged since 2013 as a key feature of China's international economic policy. The contributions offer a fundamentally novel approach towards international trade, investment and global governance in an unsettled time of shifting geopolitics when many institutions developed in the West are being called into question. The book covers a broad range of BRI-related international economic law and policy issues, including trade facilitation and connectivity, economics and geopolitics of new trade routes, foreign direct investment law, bilateral investment treaties, free trade agreements, financing of infrastructure, development aid, and international dispute resolution, and regional economic integration.

Readership

Academics in law, Asian studies, international relations, political economy; postgraduate students; policy-makers in national bodies, international organisations and NGOs; and legal practitioners.
