MORAL SELF-DETERMINATION OF YOUTH DIFFERENT SOCIO- DEMOGRAPHIC GROUPS

© 2009 A. E. Vorobieva *, A. B. Kupreichenko **

* *PhD, Moscow;*

e-mail: aeVorobieva@yandex.ru

** *Doctor sc. (psychology), leading researcher of Psychological Institute of RAS, Moscow,*

e-mail: kvit-alla@yandex.ru

This article represents empirical-theoretic analysis of moral self-determination and the author's methodological approach to its study. As the result of the research it is shown that youth moral self-determination evolution under influence of becoming a professional, getting married and child-rearing has a non-linear nature (positive and negative characteristics peaks have been observed at middle youth period and at the period of different employment types superposition). In the upshot by the age of 30-35 years personal moral position is getting more positive at some indexes under these factors influence.

Key words: moral self-determination, moral position, the attitude to the unethical objects, the dynamics and factors of moral self-determination.
