Preface

On behalf of the WWIC committee members, we welcome you to the proceedings of the 14th International Conference on Wired and Wireless Internet Communications (WWIC 2016), which was held in Thessaloniki, Greece, during May 25–27, 2016.

WWIC is a well-established conference in Internet communications, covering research topics such as the design and evaluation of network protocols, experiences from the design and implementation of wireless systems, network modeling, wireless network security and management, mobile network services, and emerging technologies such as software-defined radio and network function virtualization.

This year the conference received submissions from 20 countries in Europe, Asia, North America, and North Africa on a wide range of Internet communication aspects. After a rigorous review process, the Program Committee selected 27 papers out of 54 submissions, based on criteria such as relevance with the conference scope, originality, timeliness, technical correctness, and presentation quality. The conference program, which includes eight technical sessions, reflects this high quality level and topic diversity.

We would like to thank our keynote speakers Scott Burleigh (NASA Jet Propulsion Laboratory, USA), George Pavlou (University College London, UK), and Vassilis Tsaoussidis (Democritus University of Thrace, Greece) for delivering excellent talks on information-centric and mobile networking.

We further thank all authors for their submissions and their contribution to the technical excellence of WWIC 2016. We are also thankful to the Program Committee and all reviewers for their tremendous effort and commitment during paper reviewing, as well as to the rest of the conference organizing team for their support.

Last but not least, we would like to thank the University of Macedonia in Greece, especially the Department of Applied Informatics and its Graduate Program, and the International Federation for Information Processing (IFIP) for sponsoring the conference.

We hope that all attendees enjoyed the technical program and social activities during the conference and look forward to the next edition of WWIC.
